

We are delighted to announce that the Carolina Horse Park Foundation has entered into a contract to acquire over 65 acres of land adjacent to the Park on both sides of the stabling entrance driveway. This land purchase will provide the Park with protection from potential activities that pose a negative impact on the Park's reputation or disrupt the management of the highest quality equestrian competitions. We also believe this increase in acreage will further the expansion of our portfolio of events.

As you may know, there have been motorbike activities on those particular tracts of land in recent weeks. We want to assure you that as part of our contract, there will be no motorbike activity on the property cited above. We have secured funding for the first tract of land and look forward to finalizing the funding of the second tranche in the next 4 months. Please do not hesitate to reach out to Jane or Marc for further information. Many thanks for your ongoing support of the Carolina Horse Park!
